We would you like to thank you for choosing a video capture product. You have made an excellent decision. The following contents guide you how to use the product. Hope this device will bring you nice digital experience

Overview

After you have installed the device driver and the user software correctly, connect your device to the video output source according to the connection guide, then open the user software

You now have all the options you need for recording your favorite movies, TV shows, or life video from an analog video source onto your computer. And edit them, burn DVD disc, convert them, and send them to your iPod, PSP, or 3GP Mobile Phone. So you can watch them any where and any time.

The **USB 2.0 Video Capture,** it can capture High-quality video and audio file directly by USB 2.0 interface without sound card. The installation is very simple and the external power is unnecessary.

The **USB 2.0 Video Capture** has a snapshot button that allows you to take still photos.

The **USB 2.0 Video Capture** includes a professional video editing and converting software – "ArcSoft ShowBiz 3.5". It can provide best editing and converting function for you. ShowBiz 3.5 is a video-editing and converting software that makes editing your videos as fun as shooting them. ShowBiz 3.5 helps novice users finish stylish movies in only few steps. Share finished projects on DVD, tape, the Web, and mobile devices.

The converting function, it help you to convert the vedio file you recorded as MPEG4, AVI, and other file format, then you can send converted videos to your iPod, PSP, 3GP Mobile Phone, or other vedio device.

Specification

Item Name	USB 2.0 Video Capture
Interface	USB 2.0 standard
TV System	PAL, NTSC
Recording Format	MPEG2
Converting Format	Apple TV, iPhone, iPod classic, iPod nano, iPod touch, WMA. ASF, MPEG1, MPEG2, WMV
Input	Composite Video(RCA), S-Video(miniDIN 4pin), Audio L/R(RCA)
Resolution	NTSC 160×120 ～ 720×480, PAL 160×120 ～ 720×576
Rate	NTSC 30fps, PAL 25fps
Power Supply	USB Bus
Consumed Power	≤ 1.5W
Editing Software	ArcSoft ShowBiz 3.5
Dimension / Weight	90(L)×44(W)×28(H)mm / 72g
Cable Length	80cm(USB), 7cm(Video/Audio)
System Requirements	One available USB 2.0 port
	Pentium4 CPU or above
	512MB RAM or above
	Graphics card supports DirectX 9.0C
	1GB free HDD space
	CD-ROM for installation
	DVD-R/RW for burning DVD
	Windows XP, Vista,Seven

	Video Capture device, Software CD(includes driver, application and manual)

Connection Guide
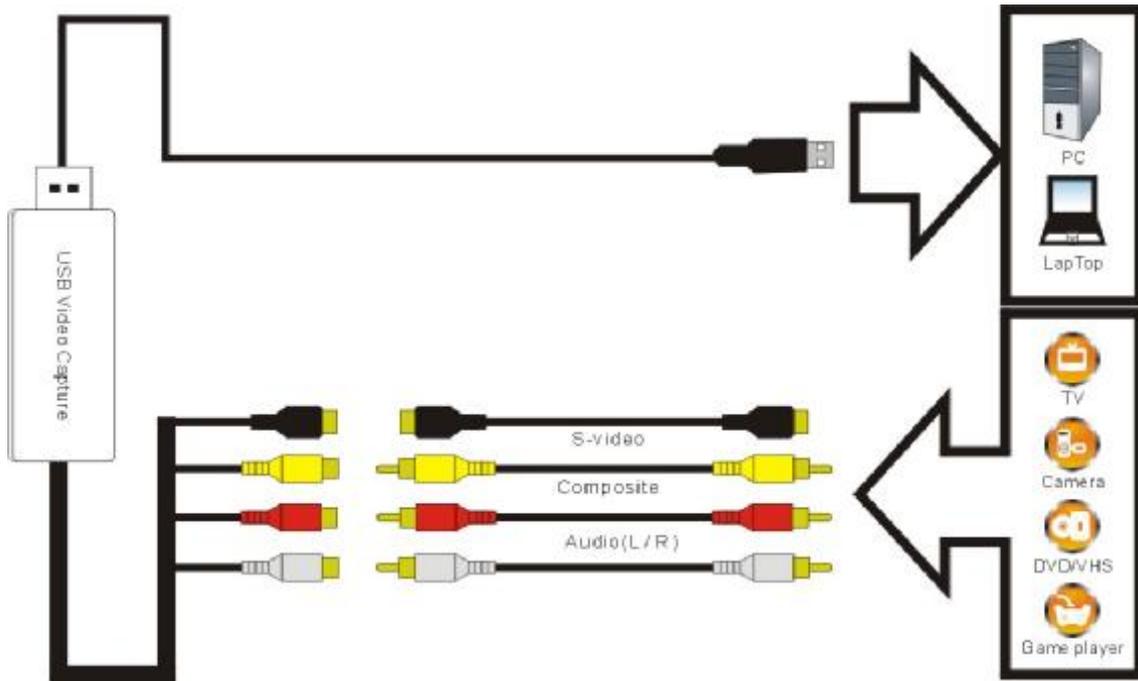

If you use a scart interface, please connect equipment following below picture and set the switch to be OUTPUT
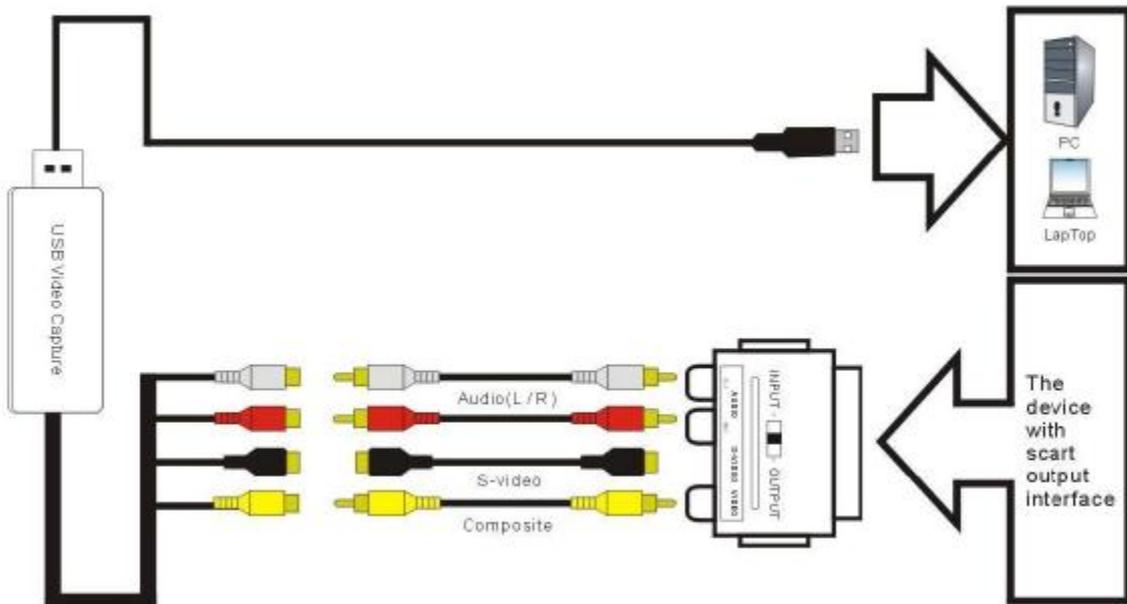

Notice:

1, You maybe have to buy Video and Audio cable, and S-Video cable to connect the USB Video Capture with your analog video device. You need to buy the Scart Video/Audio adapter if the output of your video source device is Scart type.

2, The following devices can be used as analog video sources:

Video recorder, DVD player, Video camera, Set-top box, Game player and any device that provides an analog

video signal.

Frequently Asked Questions

Question: I am unable to connect the USB 2.0 Video Capture to my VCR / camcorder / DVD player – what can I do?
Answer: When you buy a VCR, camcorder or DVD player you are usually supplied with an 'RGB lead'. This lead has three yellow, red and white connectors at each end, or alternatively it may have these connectors at one end and a Scart jack at the other end.

Question: If you have a 'mono' camcorder, when you connect it up you may get no audio whatsoever. Must I have a stereo camcorder?
Answer: **The USB 2.0 Video Capture** can work with a 'mono' camcorder.

Question: Can you see what you are recording?
Answer: A small window is found at the top of the screen to show what you are recording.

Question: If my Video is e.g. 180mins long, will it take this long to transfer via the USB 2.0 Video Capture?
Answer: Yes

Question: Can the USB 2.0 Video Capture be used to record videos from other devices such as a Sky box or straight from a television, or anything along those lines?
Answer: Yes it can. As long as the device you wish to record from has the relevant outputs required (Red, White and Yellow phono video lead). These must be outputs and not inputs otherwise it will not work. Please check the device's manual first to see whether your device has the outputs needed.

Question: Can I copy original movies onto my computer using the USB 2.0 Video Capture?
Answer: No, this is illegal. It is piracy to copy a film and then sell or lend it to another person without permission to do so.

Question: Will the videos I record onto my computer take up much space?
Answer: Yes they will. Video files are large files. You can choose the quality of the video to save space on your computer. The lower quality for the smaller file.

Question: How long will it take to record?
Answer: This is a real time capture device therefore it will take 3 hours to record a 3 hour tape.

Question: How many hours of video tape will produce 1GB of digital data.
Answer: The space depends on which format and which size you choose. For example: in AVI format there is no compression of data, and therefore it produces about 1GB for 10 minutes recording. However it only uses around 200MB if using MPEG format, and only about 30MB if using WMV format.

Question: Is the USB 2.0 Video Capture compatible with the old style video 8mm camcorders?
Answer: Yes it is. You will have to by a connection lead. You may require an RGB lead.
